

July 15, 2021

Dear Resident:

We are pleased to announce that we are bringing our fiber-optic network to Williamsburg in 2021. The fiber network will provide businesses and residents ultra-fast broadband Internet. More details on the project and pricing in a minute.

**The Most Important Step:** The most important step you need to take right now is to give us permission to bury the fiber optic line to your home or business and attach a Network Interface Device (NID). There is **NO COST** for us to bring fiber to your location if we can do it when we are building in the community. If we have to come back to do it later there will be a charge.

Go to [www.ctctechnology.net/williamsburg](http://www.ctctechnology.net/williamsburg) and complete the online permission form. Or you may use & mail the form that came with this letter. This is the first and the most important step you can take right now.

**Project Timeline:** We expect to start building the fiber-to-the-home network in Williamsburg during the fall of 2021. Our schedule is weather dependent, but we hope to get the main line fiber and some fiber lines to homes done before winter. Most likely the first customers connected to CTC Fiber Internet will be in early 2022. Our staff will contact customers who have signed up to schedule installations. Great fall weather will help us all.

**Pricing and Products:** Fiber allows us to bring you the best Internet in the world. You'll have a product that less than 30% of customers in Iowa have, but everyone wishes they had it. Fiber delivers ultra-reliable, ultra-fast, unlimited Internet with **NO data caps**; Fiber is unmatched.

Our basic Fiber Internet product will be 75Mb/75Mb for \$75 per month. Faster speeds will be available, but we're still defining our remaining Internet speeds and their prices. We will share details on our website soon. Be sure to complete the permission to bury form (online or paper) to show your interest. There is **NO COST** for us to bring you fiber during this construction phase.

CTC has been in the communications for more than 65 years, and we've been doing fiber networks for more than 20 years. Today, we serve customers in the communities and rural areas of Guernsey, Hartwick, Ladora & Victor and we look forward to serving Williamsburg too!

Questions? Please call our business office at 319-647-4638 or visit website below.

Sincerely,

Scott Schabacker  
General Manager

**Williamsburg - We're bringing you fiber!**

It's a really  
**BIG DEAL!**  
Fiber Internet Coming to You in 2021
